

Where to place your CO alarm

CO alarms should be placed in the same room as fuel-burning appliances (either wall or ceiling mounted), between 1m and 3m from the potential source of carbon monoxide. Additional alarms can also be located in bedrooms.

Boilers

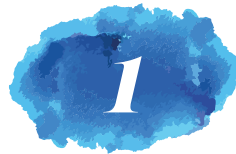

Fires

Cookers

A loud alarm is a warning that unusually high and potentially lethal levels of carbon monoxide are present. Never ignore this alarm, further exposure can be fatal.

Open doors and windows.

Stop using all fuel-burning appliances and, if possible, turn them off.

Evacuate the property leaving the doors and windows open.

In an emergency call National Gas Service on: **0800 111 999** Alternatively contact your gas or other fuel supplier on their emergency number.

Do not re-enter the property until the alarm has stopped.

Get medical help immediately for anyone suffering the effects of carbon monoxide poisoning.

Don't use the appliance again until it has been checked by an expert.
